

Ground to Cloud Standard Migration Assessment

FREE Standard Migration Assessment on Moving Microsoft Dynamics AX 2012 to the Cloud

Are you able to keep your business running when staff may be required to work remotely? Can you ensure ERP system updates and integrity when no one is in the office to support it?

Recent events have demonstrated that business systems and data readily and remotely available in the cloud is more than just efficient and cost-effective — in many cases, it is now absolutely necessary.

If you're using an on-premises version of Microsoft Dynamics AX, there has never been a better time, reason or way to get started and take next steps toward the cloud.

Dynamics AX 2012 is being sunsetted; Microsoft offering migration funds

With an end of support date of October 2021, Microsoft no longer supports Dynamics AX 2012. If you are like most businesses using this legacy platform, chances are you have a highly customized system, a large number of users, or often found the timing for a migration was never quite right.

But the time is now, in fact, it ran out, and Microsoft is doing all it can to help

customers on older platforms create a plan for digital transformation, starting with the most foundational systems.

As part of our continued commitment to our customers, ArganoArbela, in partnership with Microsoft, is offering a FREE first step to assess the feasibility of migration: a Standard Migration Assessment that outlines where you are now and what the best next steps may be to move from Dynamics AX 2012 to Dynamics 365 Finance and Supply Chain Management.

The cloud awaits

Dynamics 365 Finance and Supply Chain Management has the functionality you expect, but with the additional benefits of the cloud:

- Instant, endless scalability
- No manual maintenance or updates
- Easier integrations with other systems and data streams

In addition to assessing cloud-readiness based on your budget, timing and existing solution, ArganoArbela will also assess applicability of built-in features of Microsoft Dynamics 365, PowerApps and Power BI.

Benefits:

- Guidance and on-demand content from Microsoft and Arbela
- No-charge, no-obligation in-depth analysis
- Recommendations based on scope, timing, and budget
- Exclusive offers and financial assistance for qualified DynamicsAX customers
- High-level plan outlining deployment, cost and customizations

Requirements:

- Current Dynamics AX customer
- Current in EnhancementSupport
- ArganoArbela is your Partner of Record with Microsoft

Leveraging the Microsoft stack, we will deliver a migration plan and overall solution that does even more to support your strategic goals. One of the key benefits of the plan is to sprint and create a Dynamics 365 system, using your data. Ultimately, this approach is intended to offer less complexity, more security, provide a scalable platform for post-COVID-19 operations, and provide significant cost savings.

ArganoArbela will assess your cloud-readiness for free: no further commitment required. Contact us at info@arbela.com or call us at 1 (888) 319-4439.
