

## Practical Power BI Training

Work with an Arbela Power BI expert to turn your existing data into real insights.

You bring your data like this:

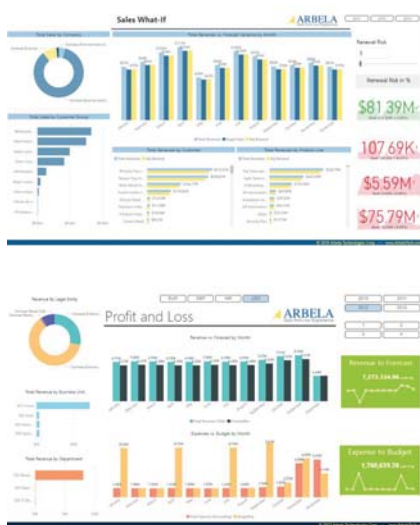

We will help you turn it into this:

## One-Day Training With Your Own Data

You identify the set of data that you want to work with, and we will help you use Power BI to display it most effectively for your end users. In one day, Arbela Power BI experts will:

- Define the critical questions that your audience needs to answer.
- Define Facts, Dimensions, and Metrics that form the answers.
- Organize your data into the most effective format to reveal answers and insights.
- Create a presentation layer that lets your data tell its own story.
- Leave you with Power BI visualizations that you will continue to use - even after we leave.
- Answer questions proactively and have the ability to use the data to make an impact.

## Visualize Data For More Impact

### Benefits

Tell your data story with interactive, intuitive analytics dashboards and business intelligence reports that put the power of data discovery into your hands.

Let us take your data and help you build a dynamic and interactive data visualization that can help you focus on what matters; your business

Present information in an intuitive format that lets your data speak for itself

Identify key points of your data story by visualizing your organizational data

Create a foundation for using the Power BI platform
